OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>coho</u>	<u>10/3/98</u>		<u>✓</u>		<u>✓</u>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: set 2 minnow traps, 24 hr, eggs one near bottom: 2 coho fry, 1 PV - one trap 300 meters up stream - no fish. No obvious barrier but stream is steep & rocky - at 50-60 meters, probably impassable

Note - unable to get GPS position at barrier - but is 50-60m from mouth

Name of Observer (please print) Peter Branson F&W Tech III, Dianne Cassidy, volunteer
Date: 10/5/98 Signature: Peter Branson
Address: P.O. Box 2073
Wrangell, AK 99429

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
